Date: June 4, 2010

Publication Number: CRSP Research Report 06-A07

The CRSP will not be distributing this publication. Copies may be obtained by writing to the authors.

Abstract: With almost half the global production and a quarter of global consumption, China is a critical player in the tilapia industry. In recent years, the quality and variety of Chinese tilapia products have improved, and state-of-the-art processing plants now handle the huge volume of product. New products and packaging are promoting additional international demand.

This abstract was excerpted from the original paper, which was published in *Global Aquaculture Advocate* pp.58-59, 2006.
