Tucson, Arizona 85706 USA

**Date:** September 3, 2010

Publication Number: CRSP Research Report 09-A02

The CRSP will not be distributing this publication. Copies may be obtained by writing to the authors.

**Abstract:** With its large quantities of water and little industry to pollute it, Guyana has the potential to become a greater player in global aquaculture. Collaboration among government agencies, universities, commercial farms and international aid groups is advancing aquaculture in the country. Currently, small farmers produce tilapia, pacu and shrimp for primarily local consumption. Further integration of aquaculture and agriculture has additional potential.

This abstract was excerpted from the original paper, which was published in *Global Aquaculture Advocate* 12(2):83-84.
