

INTSORMIL Institutions

Kansas State University
Mississippi State University
Ohio State University
Purdue University
Texas A&M University
University of Nebraska - Lincoln
USDA-ARS, Tifton, Georgia
West Texas A&M University

INTSORMIL Management Entity

Dr. John M. Yohe, Program Director
Ms. Joan Frederick, Program Manager
Ms. Kimberly Christiansen, Program Assistant
Ms. Diane Sullivan, Account Clerk

INTSORMIL Board of Directors

Dr. Forrest Chumley, Kansas State University
Dr. Frank Gilstrap, Texas A&M University
Dr. David Hansen, Ohio State University
Dr. Bill Herndon, Jr., Mississippi State University
Dr. Jess Lowenberg-Deboer, Purdue University
Dr. Z.B. Mayo, University of Nebraska
Dr. Donald Topliff, West Texas A&M University

INTSORMIL institutions are affirmative action/equal opportunity institutions

General Information

The International Sorghum and Millet Collaborative Research Support Program, INTSORMIL, is sponsored by the USAID Bureau for Economic Growth, Agriculture and Trade (EGAT). INTSORMIL was established in 1979 under the authority of Title XII of the International Development and Food Assistance Act of 1975 to link the expertise of scientists at U.S. Land Grant Universities with scientists in developing countries. At present, 18 U.S. scientists from the Kansas State University, Mississippi State University, Ohio State University, Purdue University, Texas A&M University, University of Nebraska, USDA-ARS, Tifton, Georgia and West Texas University are collaborating with over 200 scientists in approximately 30 developing countries. INTSORMIL collaborative research is currently conducted in West Africa, the Horn of Africa, Southern Africa, Central America and the United States. Present research includes the scientific disciplines of agricultural economics, agronomy, biotechnology, entomology, food science, plant breeding and genetics, plant pathology, and plant physiology.

While INTSORMIL is mandated by the U.S. Congress to provide mutual benefits to the United States and developing countries, a major goal of INTSORMIL is to improve the overall quality of life in developing countries through increased, sustainable production of grain sorghum and pearl millet in those countries where these crops constitute the major food sources. This goal is being achieved through graduate training of students from developing countries, building and strengthening research institutions, developing new production and utilization technologies through collaborative research, and efficient transfer of technologies to producers and processors of sorghum and pearl millet. Major outputs of these efforts are publications distributed worldwide that share knowledge and technology produced by INTSORMIL scientists.

This bibliography includes citations of refereed research journal articles, workshop proceedings, M.S and Ph.D. theses and published abstracts by INTSORMIL principal investigators between 1984 and 2002. The bibliography has been arranged by scientific discipline with citations arranged alphabetically by the senior author's last name. For information on obtaining General Publications contact the INTSORMIL Management Entity, 113 Biochemistry Hall, University of Nebraska, Lincoln, NE 68583-0748, by e-mail at SRMLCRSP@unl.edu, by fax at (402) 472-7978, or by phone at (402) 472-6032.
